

ILIAS

Use of ILIAS tools

Present information

File: Upload files of every format individually or as a package and offer for download

DigiSem: The university's library scans any literature you want and makes them available in your ILIAS course as a digital reserve shelf available to the students for download

SWITCHcast Series: Publish recorded lectures, annotate and analyse videos

Learning module: Create self-contained multimedia learning units and incorporate your own HTML pages

Mediacast: Upload picture, audio and video files to be viewed and played

Media pool: Collect picture, audio and video files in a pool and keep ready for other ILIAS tools (e.g. Learning module)

Weblink: Make available internal or external links or link collections

Web feed: Subscribe to webfeeds to follow the news from other websites

Glossary: Offer term definitions, write your own term definitions

Data collection: Collect, filter and search data in a database

Organize semester progress & deadlines

Folder: Store materials chronologically or functionally and make available

Session: Create course deadlines and assign corresponding materials, organize registration for events, excursions or courses

Item group: Collect existing course material in object groups and reassign as desired

Forum: With corresponding adjustment of rights in the forum, announcements and news can be shared quickly with all course participants

Group: Use the group's admission rights to register for events, seminar groups or courses

ILIAS

Use of ILIAS tools

Facilitate cooperation

Forum: Take part in time- and place-independent discussions

Wiki: Collect, design or cross-reference information, texts, comments, opinions and content of every short page by page with other users

Blog: Publish posts of every sort, pictures, audio documents or video documents and receive comments

Etherpad: Draft texts together and, more importantly, at the same time, draft minutes of meetings or course records simultaneously

SWITCHcast Series: Draft comments and annotations to videos together

Group: Work and communicate with other users as well as sharing and exchanging materials.

Request activities & documents

Exercise: Organization of tasks and submission of semester papers, texts, drafts, etc. with a feedback function

Test: Self-test to check prior knowledge and the level of knowledge and to prepare for examinations

Question pool for tests: Collection of questions or tasks for repetitive use in different tests

Portfolio template: Design a template with tabs and content

Gathering feedback & opinions

Survey: Gathering opinions and feedback, conducting evaluations and surveys

Question pool for surveys: Collection of questions or tasks for repetitive use in different surveys

Selfevaluation: Self-assessment of specific competences, clarification of needs, create decision criteria

Poll: Short survey with single-choice answers and a result overview, mood barometer, clarify preferences

Live Voting: Short survey with several question types and live results / activate students / mood barometer, clarify preferences
