Dear friend of the Microscopy Imaging Center (MIC)

Please receive the fourth MIC Newsletter in 2021. For more information about the MIC and its activities, check our [website](#) regularly.

News

Dear colleagues of the MIC board and committee
Dear Students of the Cutting Edge Microscopy Program
Dear friends of the Microscopy Imaging Center

Once again, a year comes to an end. Despite the challenging circumstances, the MIC can look back on success and highlights. Not least thanks to your support and active participation and collaboration in our events and projects. The team of the MIC wishes you and your families a peaceful holiday season and a successful Year 2022!

MIC Symposium 2021

Finally, after a missing year 2020 due to covid pandemic, the traditional MIC Symposium took place in UniS on

November 19, 2021. The topic of this year was 3D electron microscopy. The scientific committee represented by Wanda Kukulski, Michael Stoffel, Benoît Zuber (University of Bern) and Dimitri Vanhecke (University of Fribourg), prepared an interesting program, which attracted more than 110 participants. Read more [here](#).

PhD Defense

Federico Saltarin, student of the PhD program Cutting Edge Microscopy, has given his PhD defense on December 10, 2021. [Title: "Investigations on the extravasation of melanoma cells across the blood brain barrier"](#). Congratulations on the successful graduation.
