

Deduklick Database Ranking

Deduklick retains unique records from databases providing the most complete bibliographic data and removes duplicates from other databases / sources.

The database ranking has been determined by the information specialists at the University of Bern and is based on the databases they use most. This order does not claim to be the best and may not be appropriate for all users. Therefore, Deduklick offers its customers the option to customize this list (add/remove databases) and to set the order of the databases according to their own needs.

- '1': 'Medline',
- '2': 'Embase',
- '3': 'PsycInfo',
