# Deduklick How to upload & download Export & re-import your EndNote references as RIS file

When using Deduklick to deduplicate your references, you need to export and re-import your EndNote references in RIS format. This is a step-by-step guide on how it works.

Please note: For best results regarding the resulting **flowchart** (showing the numbers of references coming from different databases before and after deduplication), there's the **option of first adding/replacing database names** in your EndNote library (quick guide on <u>https://bit.ly/309f3UC</u>).

#### Export your EndNote references as RIS file

#### Make sure the folder "All References" is selected. Click on one reference and highlight them all by using Ctrl A.

EndNote 20 - Chocano17_2022

 Go to File – Export. Choose Text File (\*.txt) to Save as Type and RefMan (RIS) Export as your Output style. Make sure Export Selected References is ticked.

Choose a name and folder to **save the file** for later upload in Deduklick. *If you work from home via VPN, the export works faster if you save the <i>file on your local drive*.

If your file is large (>200 MB), it is necessary to zip it before the upload in Deduklick. Don't know how to zip a RIS file? Look it up in the **"Need more help?" FAQ file** on <u>https://bit.ly/309f3UC</u>.

### Upload your RIS file to Deduklick

1. Login with your credentials to <u>https://risklick.ch/panel/auth/login</u>.

	রা≲≰এ⊄⊀° ি Deduklick - In the menu on

## Download & Re-import into EndNote

A zip file containing two RIS files (deduplicated references and duplicates) and two PDFs (flowchart and duplicates report) is now ready for download.

**Before downloading, open EndNote and create a new, empty library!** Otherwise, while unzipping the resulting RIS files, a direct import in the current library may occur (depending on your computer's settings).

**1.** Click on **Download** below **Deduplicated File**.

A zip file will be downloaded to your download folder.

<b>Results Download</b>									

After double-clicking the zip file, you can see all documents delivered.

- 2. You may now **logout** of the Deduklick website.
- **3.** Open the **deduplicated folder**, make sure you **have an empty EndNote Library open**, and **double-click on the file name** (this is the RIS file with the deduplicated results).

*	chocano2_2023_dairy_cognition_ns	RIS Formatted File	1′469 KB						

Page4

#### 4. The import of the RIS file into the empty EndNote library will start automatically.

If it worked (depends on your computer's settings), all unique references are now visible in the EndNote library.

If it did not work with the automatic import, you may consider trying a direct import, which is outlined in the "**Need more help?**" **FAQ file** on <u>https://bit.ly/309f3UC</u>.

**5.** *Optional:* You may **re-create the database groups** through sorting the references in the "Name of Database" tab: Click on "Name of Database" tab, select all references tagged with the same database name, right-click and choose "Add References To" – "Create Custom Group...". Name the group accordingly. Repeat for all databases.
